9. ADJOURNMENT

The Smiths Falls Climate Protection Working Group is committed to: leading the Town and Community to take positive and nimble actions for long-lasting impacts; minimizing the harmful impacts of climate change at a local level; fostering the reduction of greenhouse gas emissions; implementing methods to sequester carbon, including but not limited to enhancing our tree canopy; and, building generational resilience to adapt to a changing climate especially for the most vulnerable members of the community. The Working Group stands as a catalyst for system change and recognizes that even the smallest impacts contribute to community-wide benefits."
